

To ensure the safety of our employees, carriers must comply with the following rules:

- Position the truck safely in the loading area, following the instructions of our staff.
- Hand over the key to our staff once the truck has been positioned; the key will be stored in a designated key box.
- Place the safety wheel chock. If you do not have one, please inform our staff so that we can provide one.
- Open the truck tarpaulin/curtain if necessary.
- The driver must exit the vehicle safely, wear a high-visibility vest, and wait either in the designated area or in the driver's cab.
- The driver may not secure the load with safety straps until the loading process has been completed.
- The maximum speed limit within our premises is 10 km/h.

Thank you in advance for your cooperation.
